

## PRODUCT PICKS

### GeoDeck Now Available in Walnut

GeoDeck™ composite decking is now available in Walnut. According to Green Bay Decking LLC, manufacturer of GeoDeck, the new deck board color was developed in response to requests from contractors, homeowners, and distributors for a deep, rich shade of brown to complement the variety of existing light and dark colors. In addition to Walnut, GeoDeck boards are available in Mahogany, Cedar and Driftwood.

### "Green" Cabinetry from Woodharbor

Woodharbor Doors & Cabinetry recently introduced CastPointe Frameless Cabinetry, which it describes as its first 100% Green cabinetry product line. All CastPointe box components, end panels, sides, floor, ceiling, and back, are built using EPP (Environmentally Preferred Product) products that are made with 100% recycled material. This construction is compliant with the CARB rule, California's stringent regulation on formaldehyde emissions. Woodharbor has also developed 'Green House' finish options that have a waterborne topcoat that is low VOC (Volatile Organic Compound) and formaldehyde free.

### New Low Profile Truck Mounted Forklift from Sellick

Sellick Equipment Limited has expanded the product range of its low profile rough terrain vehicles to include the all new STM55LP trailer mounted forklift. This low profile, three wheel drive loader shares many of the quality design features of the Sellick four wheel machines including

excellent visibility and a roomy operators platform. Engineered to be easy to operate, the STM55LP is said to be quick and nimble to help increase loading times. Built in the Sellick tradition of quality and reliability, the STM55LP features three wheel drive and is easily transported to any work site.
